PROFESSIONAL SUMMARY

Security Engineer with hands-on Splunk administration experience supporting an enterprise automotive platform (BMW BOBCAT, via Accenture). Handles Splunk log search, dashboards, and alerting; Azure access provisioning and MFA support; VDI troubleshooting; and IT incident management through ServiceNow/ITSD. Brings 3+ years of Linux, Python, and cloud (AWS/Azure) experience from prior software engineering roles, with a strong foundation in investigating issues end-to-end and communicating findings to senior stakeholders.

CORE TECHNICAL SKILLS

Monitoring & Observability: Splunk administration (search, dashboards, saved searches, alerts, data onboarding), log analysis, incident investigation, server-side error detection & troubleshooting

Identity & Access Management: Azure AD access provisioning, MFA (NetIQ/OT Advanced Authentication), VDI (Omniissa Horizon Client) provisioning & support

IT Service Management: Incident/ticket handling (ServiceNow), ITSD service desk coordination, root cause documentation, escalation

Cloud Platforms: Microsoft Azure (VMs, Storage, Monitor, access management), AWS (EC2, S3, IAM, CloudWatch)

DevOps & CI/CD: Docker, Kubernetes (basics), GitHub Actions, Jenkins, CI/CD pipelines, Git

Operating Systems: Linux (RHEL, CentOS, Ubuntu) administration, shell scripting (Bash), patching, systemd, cron; Windows VDI environments

Programming & Databases: Python, Java (Spring Boot), SQL, MySQL, PostgreSQL, Bash

Data Analysis & Management: Excel (pivot tables, dashboards), data cleaning, data management, and visualization (IBM Data Analyst coursework)

Project & Collaboration: Agile/Scrum, sprint & project planning, JIRA, Postman

PROFESSIONAL EXPERIENCE

Security Engineer — Accenture (Client: BMW)

Jul 2026 – Present

Mississauga, ON | Contract

- Administer Splunk for the BOBCAT platform: run search queries to investigate application and transaction errors, build and maintain dashboards and saved searches, and configure alerts to surface issues before they escalate.
- Triage and resolve IT incidents raised to the ITSD English service desk, owning tickets end-to-end and documenting root cause and resolution steps for senior review.
- Process Azure access requests for development teams and manage VDI provisioning/troubleshooting via Omniissa Horizon Client, including MFA setup through NetIQ/OT Advanced Authentication.
- Resolve Microsoft 365 licensing issues on VDI instances and coordinate recurring access and tooling issues with the platform support team.
- Communicate investigation findings, impact, and recommended fixes to senior engineers and team lead, supporting platform reliability for a large-scale enterprise environment.

Founder & Developer (Bhive Cohort) — Mandara Marketing Solutions

Jan 2025 – Jan 2026

Mississauga, ON

- Selected into Bhive's entrepreneurship cohort for early-stage founders; built an AI-powered automation product end-to-end (Python, FastAPI, PostgreSQL), including deployment and monitoring.
- Containerized services with Docker and set up GitHub Actions for CI/CD, gaining full product-lifecycle experience from development through deployment.

Java Developer — Infosys Ltd.

Dec 2021 – Jul 2022

Hyderabad, India

- Developed and maintained Java Spring Boot REST APIs for a banking platform, implementing CRUD operations, business logic, and service-layer integrations.
- Designed and optimized MySQL database schemas and queries supporting core banking transactions and reporting.
- Used Git for version control and collaborated within CI/CD pipelines to build, test, and deploy application changes.

- Worked with Azure-hosted environments (VM access, resource monitoring) as part of the application's cloud infrastructure.
- Contributed to project planning and sprint estimation within an Agile team; participated in stand-ups, code reviews, and release planning.

Software Engineer Trainee — Urjith Technologies Pvt. Ltd.

Jan 2021 – Nov 2021

Hyderabad, India

- Contributed to backend development for a gaming platform, building and maintaining services in Python with PostgreSQL for data storage and core game-service logic.
- Deployed applications on Linux (Ubuntu) virtual machines under supervision; learned package management, service start/stop, and applying OS patches.
- Wrote Python scripts to automate small ops tasks (backups, log parsing, service checks) and pushed selected log events into Splunk for the team's central search.
- Used AWS EC2 and S3 for app deployments and supported a small Azure migration exercise involving VM setup and storage configuration.

PROJECTS

Personal Portfolio Website: Personal site showcasing background and projects; built with Next.js, React, and Tailwind CSS, deployed on Vercel.

Crop Prediction (CropCast): ML-based crop recommendation system (Random Forest, ~98% accuracy across 22 crops) with a FastAPI backend and React dashboard.

SaugaHome Eats (In Progress): Marketplace platform connecting home cooks with local buyers to sell and purchase homemade food.

Training Log for Fitness Trainer (In Progress): App that helps a personal trainer keep a single log of clients' fitness routines and food/nutrition tracking.

Flight Companion (In Progress): Platform that matches travelers (e.g., elderly parents flying alone) with companions on the same flight and helps them find flight services.

EDUCATION

Graduate Certificate – Data Processing & Reporting: Conestoga College, Kitchener, ON — Apr 2025 — GPA: 3.8/4.0

Graduate Certificate – Information Technology: Algoma University, Brampton, ON — Aug 2024 — GPA: 3.7/4.0

Bachelor of Technology – Computer Science & Engineering: Swami Vivekananda Institute of Technology, India — Nov 2020 — GPA: 3.6/4.0

CERTIFICATIONS

- IBM Data Analyst Professional Certificate – Coursera
- Data Science – Sunadh Technologies (2023)
- Introduction to Machine Learning – NPTEL, IIT Madras (2019)
- Infosys Internal Certifications: Java, Spring Boot, DBMS, Maven, Postman
